@Instabot I have not talked  
to the Console Center people,  
I am just saying, the only  
game changing feature in the  
Nintendo Switch is the hand  
held game. It is a cool, fun,  
light weight controller.  
However, I would not call it  
the "game changer" that its  
being hyped up.. They can't  
get enough money from their

\$60 PSN games that they needed a new way to earn money.. There is nothing wrong with making a few new titles, but we need to see some PS2 and SNES remakes before we can start calling it a game changer. The Switch is good, but not great.. The \$300 price is impossible to justify for a lot of games. I'm sure they will add more games, but right now, it doesn't make sense to get the Switch just to add more games... I do agree the Switch is a game changer in a lot of ways, but not in other ways. Nintendo wants us to believe that this Switch system is for every one.. I just feel that there are so many games out there that are

---

worth \$60 and PSN games are overpriced.. The Switch system is perfect, but there are so many games out there that people need to realize. There are many games out there that are worth every dollar.. Since I was a kid, I have always loved Nintendo, and for me, the best way to play is with the Nintendo Switch. Since I have gotten the Switch, I must admit that there are better games out

there, but the Switch is great. Nintendo could never replace the Nintendo 64, but with the Switch, I believe that Nintendo will surpass the GameCube.. The Nintendo Switch game has changed everything in the portable game industry. It's always been great to have a
