20 minutes gameplay and its already clear that this game is a fat, steaming hot turd. AVOID. Got this game for free. With compliments from the makers who created this game.

The game is hard. Balls hard.

But it is also great.

Try it out when you can get it for free or cheap.. idk... i kinda liked it :( I liked it, and its worth a buy, but compared to the other DLCs its the weakest. I guess theres gotta be one bad apple right?. Extremely buggy.

This is an amazing game, the game was given to me for owning the previous game Nemesis Perspective and i just love it when i have friends come over and let them play as the dragon, and am very excited about the future of the game.. I bought this pack before the heroes system was integrated thus got much less for the same amount, i wish i would have had compensation, but don't expect much from steam or ankama, plus the pack isn't worth it in my opinion, items look awful and costume does aswell. Achievement Lurker: Another one bites the dust is literally just an achievement earning machine, much like it's predecessors Achievement Hunter: Begins and Cromulent. This one boasting 5000 achievements.

I bought this game for one reason, achievements. I didn't buy it to play, or because I wanted it to be challenging. People complain about getting achievements for doing nothing, 5000 achievements, it's called Achievement Hunter, what were you expecting? You know what you're going to buy.

For people like me that want cheap crap to collect achievements, it's a fantastic game and is exactly what I was looking for. Most of the time I just let the game run while I wander off and do other things, it couldn't be any easier.

But if you are only looking for an easy way to get some cool achievements, whether it's to display them, use them to spell things, make your profile look nice, or just get a high count, these games designed to do that and just that.. Very bright and beautiful scenery. I especially loved running backwards around the chasm in the pyramid killing OP mummies.. Someone took LSD and created this, and there's nothing that justifies creating so many of these games. Nothing. It's basically a twinstick bullet hell/shooter and one bullet is enough to kill you. This wouldn't be a problem if the action itself was innovative even at the slightest but unfortunately that's not the case here.

For some reason the Ubermosh series has some sort of cult following that praises every iteration, even though very little changes between the MOSHES and every change could've been implemented to the same title. The game costs nearly nothing and that's exactly as much as I had fun with it.

What's more important, this isn't worth your time.
